Austin, Tex., Dec. 22.—That the state of Texas will get back on a cash basis and the deficit be wiped out, one month earlier than has been the case during the past several years, is the prediction of state treasurer J. M. Edwards. When the states funds to the credit of general revenue became exhausted hast October, and the registering of warrants began, it was then believed that it would be the middle of next February before a cash basis would again be reached, but now it is the opinion of the state treasurer that by the middle of January, there will be sufficient funds to wipe out the deficit.

Controler H. B. Terreil decided upon a plan to expedite the remittances of collections by tax collectors, which has proved successful. He addressed a communication to each tax collector in Texas urging upon him not to keep any money on deposit, but to remit daily if necessary as fast as taxes were collected, in any amount from \$100 upward. This was followed by the collectors and as a result, six calls for registered warrants have already been made since the state went on a deficit and the state is only about 20 days behind in the payment of accounts.
